# COSHH / SDS

Ensure your employees and contractors understand the workplace risks when working with chemicals and dangerous substances. Our COSHH module has an enhanced SDS functionality, transferring information directly into your COSHH assessments to speed up the creation process.

Key Features

Apply a configurable COSHH risk matrix to align with your compliance policies and processes

Rely on full version control for traceability, transparency, and ISO 45001, 9001 and HSG65 compliance

Create brand new Assessments or use pre-existing templates and shared Risk Assessments

Save time by linking assessments with Safety Data Sheets, ensuring that all relevant substance information is captured

Attach supporting documents, images and notes to your COSHH Risk Assessments

Provide quick access to assessments via an easy to use Employee Portal
