

Hazard Reporting

Provide your employees and contractors with a simple method for reporting unidentified hazards within your business and implement controls to mitigate risk. The AssessNET Hazard Reporting tool can be accessed from any internet-enabled device via our Portal, without needing user credentials.

Key Features

Configure a risk matrix to align with your policies and processes

Use the intuitive reporting functionality to eliminate the need to train employees

Documents, images and notes can be attached to each hazard that is identified and resolved

Set customisable notification workflows to suit your needs

Provide quick and simple access to reporting forms via our easy-to-use Employee Portal

Identify recurring hazards and implement measures to mitigate associated risks
