# Logbook

Our customisable tool provides your team with visibility and control of Logbook and Checklist tasks and can be used for all manner of work activities – not just those which are health and safety-related. Key features include Customisable Templates, Remedial Action Management and Data Export capability to make data analysis easy.

Key Features

Create and manage templates to capture all the information required for your Logbooks

Define what constitutes a "concern" and be notified when it is selected by a User

Set up recurring notifications for your userbase, to ensure Logbooks and Checklists are completed in a timely manner

Export Logbooks to use off-line or within other analytical tools

Track remedial actions for Logbook entries, ensuring that actions are assigned to resolve concerns raised

Integrates with our BI reporting tool to display data in refined detail
