# Permit to Work

Your duty of care obligations to keep workers safe and well extend beyond your own employees to cover 3rd party contractors and suppliers. The AssessNET Permit to Work module enables users to create, request and manage permits for high risk works.

Key Features

Create your own powerful Permit to Work templates, adding questions and sign off processes to all stages of the documents life cycle

Attach existing Risk Assessments from AssessNET's Risk Assessment module directly into the Permit

Send automatic notifications to users required to authorise Permits once they have been raised

Maintain visibility of Permits via a live dashboard to help ensure ongoing compliance

Comprehensive exporting system, allowing you to print out Permits at any stage for contractors with no access to AssessNET

Assign tasks efficiently and automate notifications by utilising the AssessNET Task Manager
