

Safety Inspection

The AssessNET Safety Inspection module helps you to automate the activities that feed into, and result from, your safety inspection processes. Key features include Configurable Templates, Remedial Action Management and a Data Analysis tool for real-time information management.

Key Features

Inspect individual areas, and observe safety protocols in each areas pertinent to each one

Complete inspections quickly by adding positive observations

Record negative observations and allocate actions to relevant employees to resolve them

Rely on full version control for traceability, transparency, ISO 45001 and HSG65 compliance

Create brand new Inspections or use pre-existing templates

Attach supporting documents, images and notes
