

Cyber Security Awareness Training

CPD, IIRSM

Description

This online training course should be used by all employees within an organisation. It offers straightforward practical steps that will help to protect an organisation from cyber-attacks. The course aims to help the user understand how security breaches can occur, what to do to prevent cyber-attacks, and how to identify security weaknesses and strengthen them.

Sections

- 1. Cyber Security Overview**
- 2. What You Can Do**
